

Dear Sir or Madam,

I have been a long time and loyal subscriber to XM Radio and have benefited greatly from their service over the years. My favorite aspects of satellite radio are the variety of programming, the quality of the signal compared to AM/FM reception, and the coverage that it provides as my family and I travel extensively through the country.

As a paying subscriber (with 2 accounts), I feel I should be able to access the programming I want without NAB dictating what I should be able to receive. I urge you (the FCC) to reject NAB's petition 04-160 and continue to allow XM Radio to provide the programming that improves my family's quality of life.

Respectfully,

Daryl & Theresa Warinner
